Thanks for the update, Robert. I've forwarded this msg to OSCs Fife and Delgado. Upon receipt of your official COI, Cora can provide her decision.

Greg and Eric, we'll send you the COI notice upon our receipt.

**Subject:** FW: ER Activation

---

Cora/Linda/Haven,

I really have no technical update to our response. We have mobilized nine STARTs as requested by OSC Fife, and they are on their way to New Mexico, if not there already. We have also mobilized the Mobile Command Post and several pieces of air monitoring equipment, primarily to monitor for potential radiation in dust particles associated with the fire.

I wanted to let you know that Weston has done quite a bit of work, and continues to work, for the Department of Energy at the Los Alamos National Laboratory. The work that we have primarily done is what some would consider staff augmentation, providing technical support to LANL in the area of waste management and disposal. I will be preparing a formal COI submission to notify you of this. While we realize that this is not our decision to make, we do not see this as a conflict of interest, as these are two Federal Agencies that will be working together on this response. In fact, we intend to leverage the site knowledge that we have and provide this information to OSC Fife as warranted. David has a scheduled meeting at your office today at 2:00 (unrelated to this response). We would be happy to have a conference call at 1:00 central, that David can attend in

9470961

person, should you wish to discuss this in detail.

Let us know.
